

Recommendation Letter

To Whom It May Concern,

I am pleased to provide this letter of recommendation for Panagiotis Papadopoulos, a former full-time student in the Department of Informatics and Telecommunications at the University of the Peloponnese, Greece.

I first met Panagiotis when he enrolled in my courses, "Wireless and Mobile Communications I" and "Modern Cellular Communication Systems." He was a diligent student, consistently attending lectures and actively engaging in the learning process. His performance in written examinations was consistently excellent (top 5%).

From May 2022 to September 2024, Panagiotis worked under my supervision in the research project "PANDORA - Observatory of Electromagnetic Fields Emitted from 5G Networks in the Peloponnese Region," hosted at our Wireless and Mobile Communications Lab. He volunteered for this project, showing great commitment and dedication and his contributions were key to the advancement of our research goals. He was involved in a variety of tasks including field measurements across the Peloponnese region, the design of promotional materials, and the organization of project-related events. He utilized a range of software and tools such as Matlab, Echo, and Figma, approaching each task with professionalism and creativity, demonstrating strong analytical skills, creativity, and a keen interest in advancing the research objectives.

Moreover, Panagiotis possesses commendable communication skills, which were evident in his written reports and in his interactions with colleagues. He was always eager to receive feedback and quick to incorporate it, which significantly enhanced his growth as a researcher as well as his leadership skills in various situations.

Based on my experience working with him, I am confident in Panagiotis's ability to succeed in future academic pursuits and professional roles that require strong analytical, organizational, and collaborative skills. I wholeheartedly recommend him for any future research opportunities or professional engagements.

Should you require any further information or clarification, please do not hesitate to contact me.

Sincerely,

GEORGIOS TSOULOS GEORGIOS TSOULOS
